Consumer contributes most profit

Sales grew every year, from about [2.26M in 2014] to about [4.3M in 2017]

Profit grew more slower than sales

Strength: Sales grew strongly every year, roughly 90% from 2014 to 2017 (Yearly chart)
Eastern Asia, Southern Asia and Central America earned the highest profits (Region table)
Technology is the leading category by sales and profit (Category table)

Weakness: Central Asia is loss-making (about −7.3K) (Region table)
Southeastern Asia has high sales (about 884K) but a margin of only about 2% (Region table)
Profit margin has not grown with sales (Margin line)
Large orders can lose money (for example the Cisco TelePresence order)

Opportunity: Canada has a margin of about 27% on small sales, so growing it could lift overall margin (Region table)
Fix discounting in low-margin regions and categories (Avg Discount chart)
Focus on top customers and on [the best segment] (Top 10 chart and Segment table)

The **objective** of this analysis was to review the performance of Global Superstore, to identify why profitability has not grown in line with sales, and to recommend corrective actions.

Relational Report, Multidimensional Report, Comparative Analysis, Executive Dashboard and Business Scorecard, and the Analysis page created in this experiment.

Key findings: Total sales were 12.64M and total profit 1.47M, giving an overall margin of [11.6%]. Sales rose from 2014 to 2017. Africa was the most profitable region, and Asia was loss-making. Technology was the most profitable category and Furniture the least. Consumer contributed the highest profit.

Conclusion: Sales growth alone does not guarantee profitability. Targeted action on loss-making and low-margin areas, together with growth in high-margin segments, will improve overall profit.
